

Gibraltar Mine: A Rock-Solid Foundation for Career Growth

At Taseko Mines, we're proud to call British Columbia our home. We are looking for enthusiastic employees who share our vision for long-term, responsible growth in this province.

Joining our Gibraltar Mine team makes you part of Canada's proud mining heritage. The Gibraltar copper-molybdenum mine is a cornerstone of the regional economy and an example of great Canadian mining in action. Located in the heart of BC's stunning Cariboo region, Gibraltar is approximately 60 km north of Williams Lake. It is the second largest open pit copper mine in Canada.

A sustainable mining operation with a 27 year mine life, Gibraltar is undergoing a significant multi-phase expansion taking our daily milling throughput to 85,000 tons per day and we're looking for talented candidates to help us facilitate this. That's where you come in...

We currently have a full time opportunity for a:

METALLURGIST

Position Summary:

Reporting to the Senior Metallurgist, the Metallurgist is responsible for applying metallurgical knowledge for troubleshooting daily process issues in either the mill or SXEW circuit.

Specific Duties and Responsibilities include the following:

- Continuously monitors metallurgical efficiency of the crushing, grinding, copper and moly flotation circuit, and SXEW circuit.
- Reports and achieves each shift's metallurgical and production targets
- Applies metallurgical expertise for achieving daily KPI's
- Provides operational guidelines and other technical information to operating personnel
- Maintains and troubleshoots analysis equipment and controls and investigates process problems and develops solutions
- Implements assigned metallurgical projects, writes and submits daily metallurgical records
- Ensures concentrate and cathode produced is tracked and shipped to designated destination and meets sales contract specifications
- Provides carriers with concentrate forecasts and manages the truck, rail and marine vessel logistics of concentrate shipments and ensures each service provider meets contractual obligations and statutory requirements
- Coordinates repairs, maintenance and periodic cleanout of concentrate shed, maintains shipment records and arranges for payment of rail carrier invoices
- Maintains effective information exchange with operations department to resolve common issues or problems

Qualifications

- Degree in Metallurgical or Chemical engineering with experience in base metals recovery processes
- Registered professional engineer or eligible to become registered
